

AMICO

POWER TOOLS

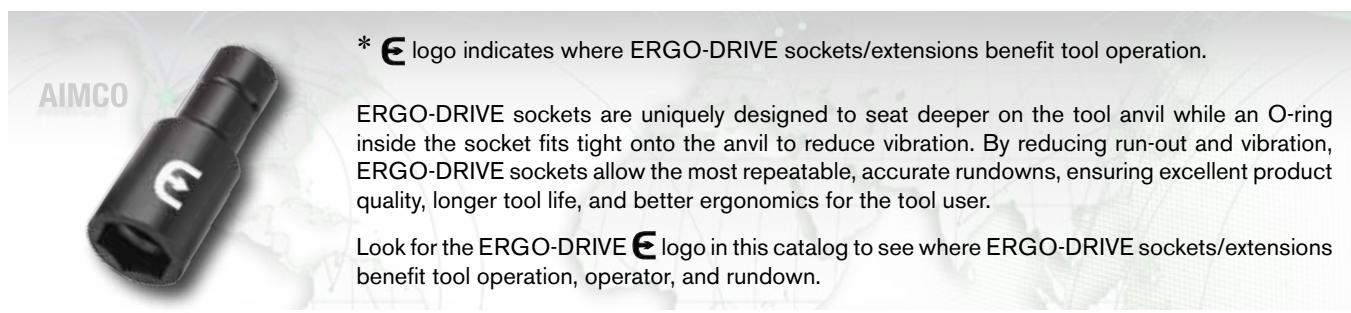

For over 40 years AIMCO has been working with manufacturers around the world, we are the complete global source for all assembly, fastening, and critical bolting needs. AIMCO can effectively and swiftly meet your needs whether you're in Thailand fastening a 3 mm nut at 3 Nm, or in Tennessee, USA torquing the last lug nut. AIMCO provides the tools and solutions, on a global scale, that guarantee the success of your project. It is with great pride that AIMCO can say the products that we manufacture are **MADE IN THE USA**.

IMPACT TOOLS	30
GRINDERS AND SANDERS	31
DRILLS & PERCUSSION TOOLS	32

* **E** logo indicates where ERGO-DRIVE sockets/extensions benefit tool operation.

ERGO-DRIVE sockets are uniquely designed to seat deeper on the tool anvil while an O-ring inside the socket fits tight onto the anvil to reduce vibration. By reducing run-out and vibration, ERGO-DRIVE sockets allow the most repeatable, accurate rundowns, ensuring excellent product quality, longer tool life, and better ergonomics for the tool user.

Look for the ERGO-DRIVE **E** logo in this catalog to see where ERGO-DRIVE sockets/extensions benefit tool operation, operator, and rundown.

AIMCO PULSE TOOLS: OVERVIEW

HOW DOES A PULSE TOOL WORK?

The unique design of a pulse tool, combining motor power and hydraulics, leads to an assembly tool that produces smooth, controlled torque in a series of very fast (2 – 4 ms) events and virtually no torque reaction.

- At free-speed, the entire pulse unit, a sealed cylinder containing hydraulic fluid and an output shaft, rotates at the same speed as the tool motor.
- As resistance to rotation increases, the rotation of the output shaft slows, while the rotation of the cylinder

and the hydraulic fluid continues until they approach a seal point within the cylinder.

- This seal point produces an increase in fluid pressure and transmits the energy from the rotational mass of the cylinder and fluid to the output shaft, producing torque on the fastener.
- After a series of these cycles (pulses), fluid pressure builds to a point that overcomes the limit of a relief valve, allowing pressure to drop and torque to be controlled

TIMELINE

1965

NEW TECHNOLOGY

The first pulse tool prototype was designed in an attempt to provide a tool that would provide torque control without the high maintenance costs of impact wrenches.

1980

U SERIES

Uryu produces the U-series, the first pulse tools to be available commercially for assembly. The U-Series evolves over the next several years to cover torque ranges from 4 – 850 Newton meters and finally, the development of full-shut-off tools. The lack of torque reaction and accurate, repeatable torque makes these tools a manufacturer standard.

1988

EC SERIES

The EC Series (and later the MC Series) combines the advantages of pulse tools with the technology of controlled tools. By incorporating a transducer into the design of the U-Series pulse tool, customers gain the Productivity and Ergonomics of pulse tools and the traceability and control of other transducerized assembly tools. Manufacturers with safety critical applications now have many more options for assembly tools.

2006

UEP-MC SERIES

Uryu does what no other manufacturer can by developing the UEP series, the first and only electric powered pulse tool. The lower speeds, quiet operation, and extremely repeatable torque make the UEP the perfect choice for applications where accuracy and clean operation are critical. By combining programmable tool speed with the MC-style transducer, extremely accurate and repeatable torque is achieved on a variety of applications.

2012

UDP-MC CONTROLLED SERIES

Uryu introduced the UDP-MC controlled series – smaller, lighter electric pulse tools that have an integrated fan unit. The state-of-the-art UECD controller with a built-in driver box eliminates the need for a secondary driver box in the system configuration.

OMEGA PULSE TOOLS: OVERVIEW

BENEFITS OF AIMCO PULSE TOOLS:

Pulse tools offer advantages in all of the PERQ® elements – productivity, ergonomics, reliability and quality.

By partnering with AIMCO, manufacturers can apply the advantages of pulse tools in many ways to reduce production costs and increase profits.

- Productivity – Combining high operating speeds with one-handed operation, AIMCO pulse tools help manufacturers produce at the highest possible rates.
- Ergonomics – Light weight, low vibration and no torque reaction make AIMCO pulse tools the safest assembly

tools available for threaded assembly.

- Reliability – Advances in design and AIMCO's extensive maintenance and training programs add up to years of low cost service from any AIMCO pulse tool.
- Quality – AIMCO pulse tools offer the most repeatable torque and clamp load results of any assembly tool, guaranteeing high product quality for manufacturers.

1995

ALPHA SERIES

The Alpha-series continued Uryu's advancements in pulse-tool design. In order to achieve the best possible power-to-weight ratio, the Alpha 9-blade, twin chamber air motor is developed. Still unique today, this new motor provides significantly more power, thereby, reducing cycle times and improving torque repeatability. The new Alpha air motor and design changes make the tools smaller and lighter, keeping Uryu at the forefront of pulse tool technology.

2001

ULT / UL SERIES

Continuous innovations and developments include a new O-ring design that improves durability, roller bearings in the pulse unit to increase hydraulic fluid life and redesigned porting helps maintain fluid temperature and torque repeatability. UL tools, with their non-shut off operation, are ideal for applications where the lightest, fastest tool is necessary. Each model features the powerful Alpha air motor and latest in pulse unit design.

2013

UA-AMC CONTROLLED PULSE SERIES

The UA-AMC Series features angle measurement for improved process control. It detects cross threading, double hits on the same fastener, stripped and damaged fastener threads and incorrect fasteners. It also features patented Auto Relief Technology, which modulates the beginning of the torque event, increases pulse frequency, and reduces resistance during the non-pulsing portion of the cycle. This shortens cycle time and increases fluid life.

UAT SERIES

In 2013, Uryu developed and patented the latest innovation in Pulse Tool technology. Auto Relief (PAT) enables efficient delivery of torque energy to the application. Auto Relief responds to ever-changing pressures in the pulse unit, applying its energy in a smooth manner to the joint as the torque is developed. The Auto Relief valve is fully open during free run and automatically closes when torque resistance is sensed. No adjustment required. Benefits include elimination of initial torque spike on hard joints, reduction in oil flow resistance, and maximized performance of the tool.

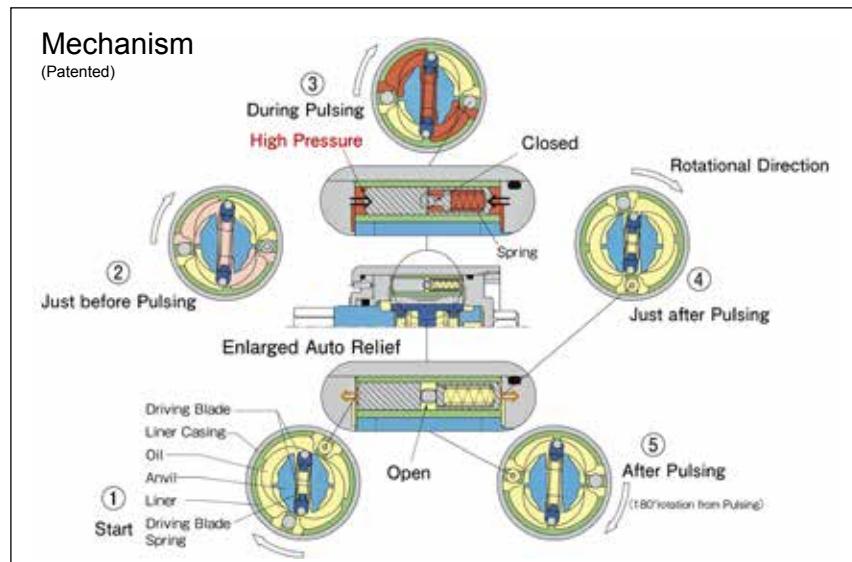

OMEGA PULSE TOOLS: UAT SERIES

PATENTED AUTO RELIEF TECHNOLOGY:

UAT features patented Auto Relief Technology providing additional control to the application of torque during the pulsing events.

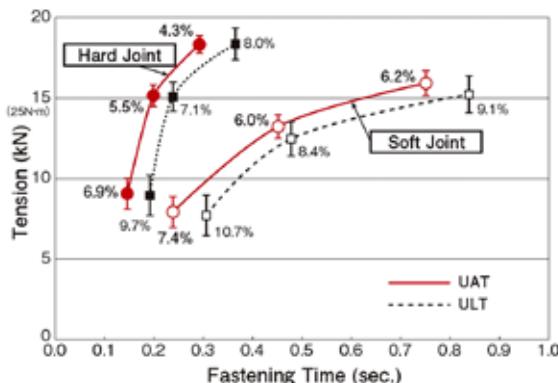

- Auto Relief eliminates initial spike of torque during a cycle. Highly effective on hard joint applications.
- Auto Relief ramps up pressure within the pulse unit resulting in more pulses in less time providing a more efficient and even torque event.

A NEW LEAP FORWARD IN PRODUCTIVITY AND QUALITY:

- Fastening accuracy and time can be improved by as much as 30% depending on application.

OMEGA PULSE TOOLS: UL SERIES

OMEGA UL SERIES

Whether the goal is improving productivity, ergonomics, reliability, or quality, the UL Series contains the technology to achieve success.

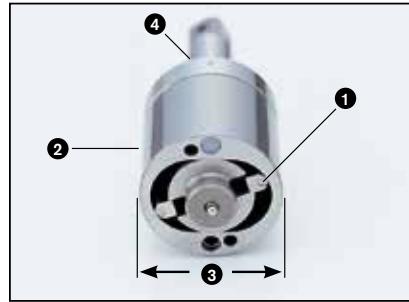

FEATURES AND BENEFITS

- Models available from 6 – 260 Nm (4.4 – 170 FtLb)
- Models with air, electric, or battery power.
- Available in Standard, Tightening Monitor, and Transducerized versions.
- High power-to-weight ratio
- Simple operation
- Reduced Maintenance
- Extended service life
- Environmentally friendly design.
- Accurate and repeatable

UL-50

Omega Series Pulse Unit

- ① Roller bearings – reduced friction.
- ② Accumulator – stable fluid temperature.
- ③ Reduced size – lightweight tools.
- ④ New O-ring design – better durability

UDBP PULSE SERIES CORDLESS TOOLS

The next-generation cordless pulse tool combines industry-leading pulse technology with Lithium-Ion battery power.

FEATURES AND BENEFITS

- Uryu Direct Battery Pulse (UDBP) – This new design connects the pulse unit directly to the motor – no reduction gearing – resulting in a tool with less noise and vibration.
- The new brushless Internal Permanent Magnet (IPM) motor provides longer motor life and more efficiency allowing more fastening cycles per battery charge.
- UDBP features patented Auto Relief Technology providing additional control to the application of torque during the pulsing events.
- On board LEDs for application illumination.
- Li-Ion battery provides more power and ends the “battery-memory” issues of NiCd batteries.
- Tool/battery combination is 27% lighter than earlier UBP tools.
- RF Types transmit “good” signal to receiver (sold separately) over 426Mhz.
- “Good” signal can be used for Poka-Yoke or Bolt Counting.

The lithium-ion battery provides better power-to-weight ratio. It will not be affected by the memory effect caused by repeated recharging after being only partially discharged.

The battery power indicator provides you with a visual indication to charge the lithium-ion battery.

● = good charge ● = low charge (recharging needed)
● = very low charge (immediate recharging needed)

Battery: UB111Li, UB222Li, UB333Li

The slide design battery provides the high-energy efficiency in power and no damage to contact.

Charger: UBC

(P) represents the 3/8" square drive anvil with socket retainer pin. (RF) represents the tool with wireless transmission feature.

UDP-TA SERIES

DIRECT PLUG IN, SHUT OFF PULSE TOOLS

FEATURES AND BENEFITS

- Direct Wall Plug in – Tool plugs directly to 100-115VAC wall power with circuit protection breaker box or integrated power cable balancer.
- Brushless (IPM) Motor provides long motor life with integrated trigger activated fan for increased duty cycle.
- Patented Auto Relief Pulse Unit Technology.
- Lightweight, high impact, rugged plastic housing for superior ergonomics.
- Optional power cable integrated balancer available.

910-627-0	5M UDP Extension Cable*

* Extension Cables connect between Tool and Breaker Cables

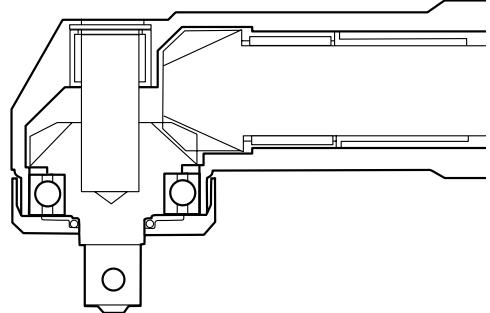

NUTRUNNERS: OVERVIEW

UAN SERIES ANGLE NUTRUNNERS

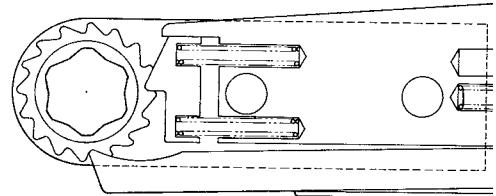

- Torque Control
- Electronically Monitored or Controlled Type

Designed for fastening in tight quarters or applications not served well by a pulse tool. The UAN Series transfers torque through beveled angle gears, continuously driving the fastener. When the resistance to rotation overcomes the spring resistance on the clutch, the tool will disengage at the adjusted torque value. Low reaction force characteristics on hard joints make it comfortable for the operator to use. Ideal for applications ranging from 6-60 Nm (4 – 44 ft-lbs).

URW SERIES IN-LINE RATCHET WRENCHES

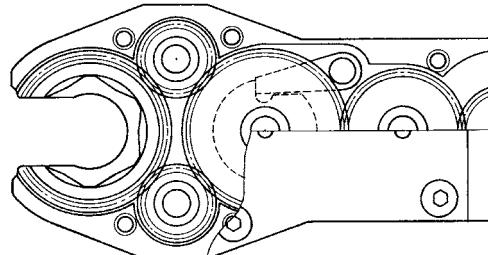

Designed to set flush over the fastener head, the URW Series is ideal for narrow fastening spaces. Motor torque is transferred from a gear driven, dual lobed cam that pushes a spring loaded push rod, rotating the socket one tooth at a time. A wide variety of socket sizes, head thicknesses, and tool lengths allow the URW Series access to many difficult applications.

UOW SERIES OPEN-END NUTRUNNERS

Designed for tubenut fastening, the UOW Series can transfer torque through a variety of options.

- Stall Type – Depending on the application requirements, the standard UOW Series will stall when torque resistance matches power output.
- Mechanical Shut-off Type – For greater torque accuracy and less reaction impulse to the operator, the UOW-T Series incorporates a mechanical clutch to shut off the tool at the preset torque.
- Electronically Monitored Type – For critical torque applications requiring monitoring or controlling of the fastening torque, the UOW-M Series utilizes a transducer to signal the clutch shut-off.
- UOW series incorporates a one-hand, two-step throttle, which automatically reverses the socket to a preset open position.

DYNATORQUE MANUAL TORQUE MULTIPLIERS

FEATURES AND BENEFITS

Manual Torque Multipliers offer the perfect, economical solution to high torque bolting applications.

- Superior power to weight ratio.
- Delivered torque accuracy +/- 4%.
- Anti-Wind Up feature (2,800 NM models and up).
- True Torque Multiplication Ratios.
- Standard Reaction Arms supplied. Custom reaction arms/nose extensions available to suit specific applications.
- Replaces long lever arms and/or slugging wrenches.
- Manually powered – no external power source required.
- Value priced.
- No preventative maintenance required.
- Overload protected by Shear Drive design.

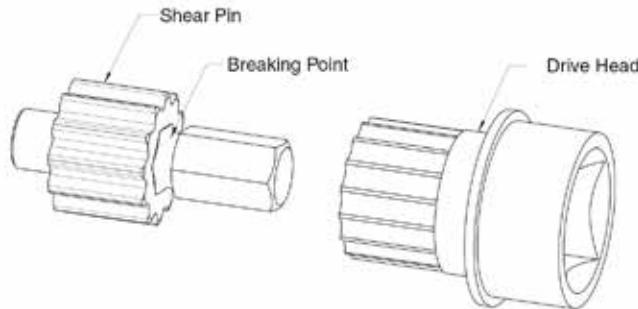

ANTI-WIND UP FEATURE

Standard on models delivering 2,800 NM and up.

- Eliminates the backward force on the torque input device.
- Insures safe operation by the operator by not allowing the input device to spring backward when released.
- Eliminates the need to continually rotate the input device in 360 degree movements to apply torque. In many applications this is simply not possible.
- Facilitates removal of the multiplier from the application upon completion of the job.

SHEAR-OFF SYSTEM

In order to protect the gear system against overload, DynaTorque Multipliers are fitted with a controlled shear-off system (spare torsion shaft included). Sheared off pins can easily be replaced at the work site.

ACCESSORIES

CARRYING CASE

All DynaTorque Multipliers are supplied in a rugged, weather-resistant, portable carrying case.

SCREWDRIVERS: OVERVIEW

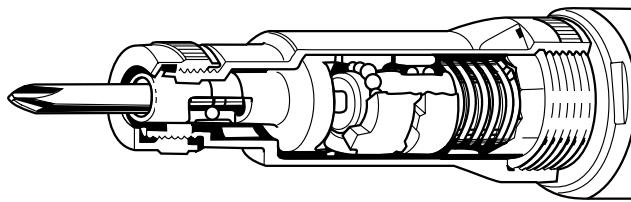

TORQUE CONTROL AUTOMATIC SHUT-OFF TYPE

- Precise repeatability improves quality.
- Minimal wear on internal parts for longer life.
- Quick shut off for minimum torque reaction.
- Speed choice for flexibility.
- Easy external torque adjustment.
- Midrange air motor provides high speed during entire cycle.
- Ideal for industrial torque control applications.

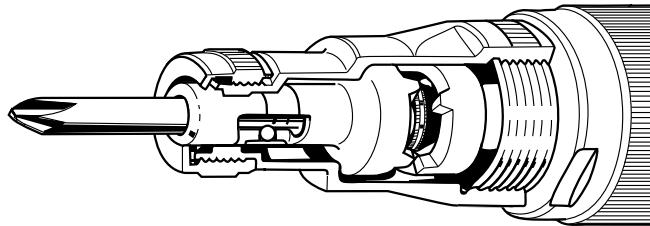

CUSHION CLUTCH TYPE

- Good general duty screwdriver.
- High speed rundown.
- Clutch ratchets at preset torque.
- Internal torque adjustment.
- General assembly, wood, and sheet metal screws.

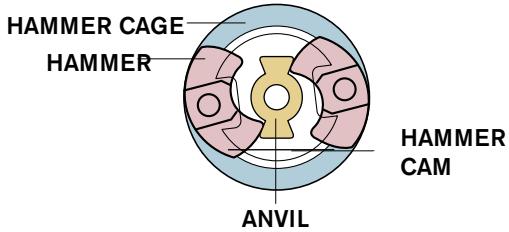

POSITIVE CLUTCH TYPE

- Good for varying torque applications.
- Clutch ratchets at preset torque.
- Operator can force clutch engagement for higher torque.
- Good for prevailing torque applications.

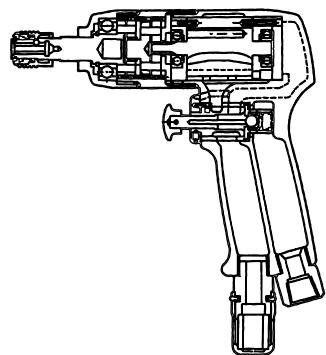

IMPACT TYPE

- High power-to-weight ratio.
- Fast cycle times with free speeds up to 16,000 rpm.
- Ideal for non-critical applications.

DIRECT DRIVE

- Air motor driven gears.
- Stall torque dependent on air pressure.
- Simple maintenance.
- Lightest and smallest air screwdriver.
- Ideal for soft draw applications such as wood screws, self tapping screws, or trim screws.

SIGNATURE SERIES PRECISION CLUTCH CORDLESS TOOLS

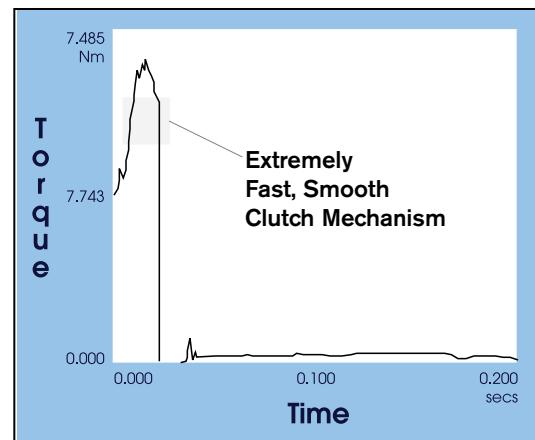

SIGNATURE SERIES PRECISION TOOLS

Simple to use, yet sophisticated in performance, the AIMCO Signature Series pistol tools provide the operator the performance required to meet the needs of today's cordless tool applications.

The ergonomic handle design provides the operator ideal balance and weight. These tools allow for fastening in hard-to-reach locations at torques up to 9 ft-lb (12 NM) in the pistol configuration and 52 ft-lb (70 NM) in the angle nutrunner configuration. The Signature Series Precision Clutch range features a wide range of torque outputs and the ability to program the tool speed for the demands of the application. Bright LED indicator lights provide clear feedback to the operator on OK/NOK tightening result, Tool Direction setting, and Battery Status. Signature Series Precision tools all operate with a single 18V Li-Ion Battery and common chargers to maximize flexibility while minimizing cost associated with differing battery chemistries.

Typical Torque Graph of the Signature Series Precision Cordless Tools

SIGNATURE SERIES PRECISE QUICK RELEASE CLUTCH

The Signature Series tool features a quick releasing clutch that delivers accuracy across multiple joint types. Each clutch assembly is constructed of precisely machined parts to guarantee accuracy and durability over the life of the tool. In addition to tight tolerances, the driving anvil is well supported to ensure that torque is precisely sensed by the clutch and not influenced by side loads or runout of the tool's rotating components.

Whether the application is made up of soft materials, such as plastics or gaskets, or harder materials, such as direct metal to metal joints, the Signature Series Precision Clutch tool delivers the accuracy the job requires.

• Pistol Grip Tools include: Torque Adjustment Tool and one (1) 18V Li-Ion Battery

• Angle Nutrunners include: Torque Adjustment Tool, Head Indexing Spanner Wrench, and one (1) 18V Li-Ion Battery

* High torque tools feature fixed RPM.

Signature Series tools can be adapted to a wide range of application-specific configurations. Contact your AIMCO Representative for assistance, 1-800-852-1368.

SIGNATURE SERIES CORDLESS TOOL BATTERY, CHARGER & ACCESSORIES

BATTERIES AND CHARGERS

The AIMCO Signature Series battery and charging system could not be more simple. One universal battery and one universal charger interface with any of the Signature Series Precision Clutch tools. Pistol type, angle type, low amount of torque output, or the highest torque tool in the range, each tool utilizes the same 18V Lithium Ion battery for superior charge life and weight. The charger accepts input AC power of 100–240AC, making use simple anywhere in the world.

The Signature Series battery features a slim profile design and a slide mount connection to the tool, which ensures durability and makes changing out batteries simple.

SPC-B218LI

SPC-C218-19

BATTERY AND CHARGER SPECIFICATIONS

BATTERY MODEL NUMBER	VOLTAGE	TYPE	CAPACITY	WEIGHT
SPC-B218LI	18V	Li-Ion	2.0Ah	.8 Lb/.4 kg
CHARGER MODEL NUMBER	OUTPUT	INPUT	DIMENSIONS	WEIGHT
SPC-C218-19	18V-19.2V, 3.0A	100-240VAC, 50-60Hz	6.25" deep X 5" wide X 3.5" tall (w/o Battery) 158.75 mm X 127 mm X 89 mm	1.2 Lb/.54 kg

TOOL SPEED PROGRAMMER

The Signature Series Precision Cordless tool line is capable of specifically programming the running RPM into the tool within its range of operation. Each tool in the range has an integrated Mini USB connector that couples to the Signature Series Programmer module. Simply connect the tool to the Programmer Module and flash the tool to the desired RPM. Once flashed, the tool will hold the RPM setting until a change is desired and it is re-flashed. New tools, that have not been specifically set by the programmer module, will run at their maximum rated RPM as shown in the catalog table and on the tool label.

SPC-2-PGM

QUICK CLIP

Carry your Signature Series Pistol tool on any work belt with the Quick Clip. The two piece Quick Clip comes with a belt clip and a stretch cord attachment for the tool. The patented ball feature allows for quick and easy release on the belt. The Quick Clip keeps the tool well balanced and frees the operator's hands for other tasks.

SPC-QC

HOLSTERS

For ease in carrying your Signature Series pistol and right angle tools, AIMCO offers several holster designs.

SPC-P-HL

TOOL BASKETS

21226

Tool Baskets are a great way to keep the Signature Series tool in place when not being used. AIMCO tool baskets can be affixed to a bench or rack and can be used for either a pistol or right angle tool.

BODY JACKETS

MODEL	DESCRIPTION
BJ10082	For Signature Series G2 Pistol Tools
BJ10083	For Signature Series G2 Angle Nutrunners

ELECTRIC SCREWDRIVERS

Electra SERIES

- Available in push-to-start and lever start styles.
- Ergonomic design – Lightweight, compact housings ensure operator comfort during operation.
- Accurate torque control – Precise controlled fastening with automatic shut-off clutches.
- External brush replacement – Virtually no down time for brush replacement.
- External torque adjustment – Torque level can be easily adjusted by simply turning the external adjustment ring.

AE-5681

- UL Listed and CE Certified – Drivers meet electrical safety standards in both the U.S. and Europe.
- Direct plug-in style – Offers easy and convenient start-up (certain models) simply plug it in.
- State-of-the-art motor design – Ensures comfortable grip temperature for operator and extended motor life.

- 1 220V AC is available upon request. Contact AIMCO at 1-800-852-1368.
- 2 Low voltage units require an external power supply.

- 3 AE-5681 includes a torque cover.
- 4 AE-8681 includes a pistol grip handle adapter

ELECTRA LOW ESD SERIES

- Grounded bit – Grounded chuck assembly routes any existing charge to ground.
- Carbonized housing – Handle material and buttons are constructed of carbonized plastic throughout, enabling any charge received by the handle to be routed to ground.
- Long-Lasting ESD resistant handle – Material will maintain its integrity for the life of the handle, unlike coatings or paints.

ELECTRIC SCREWDRIVERS

ELECTRA SLIP CLUTCH SERIES

- High-speed performance – For quick and consistent assembly and disassembly
- Maximum ergonomics and convenience – Offers a combination of a slip clutch with a high speed motor to provide low torque reaction; one of the best power-to-weight ratios in the industry.
- Added maintenance feature – A LED light indicates when to change brushes. Brush cap contains a switch that shuts off the power during brush replacement.
- Direct 110V plug-in – Eliminates the need for an external power supply.

AE-2015

- 1/4" hex quick change chuck – For easy bit changes
- External torque collar – For easy torque adjustment.

PRECISION SERIES

For low torque applications

- Featuring ergonomic design in shape and materials.
- Comes with options such as long-life brushless motors and adjustable speed power supplies.

AE-6300

STANDARD MODELS

- Optional speed control power supply – Enables infinite control from 20% to 100% of maximum tool speed and adjustable soft start to minimize cross threading.
- Ergonomic housing – Oval shape conforms to hand.
- Duralite – New casing material provides a secure grip.
- Integrated Lever – Feather touch integrated lever reduces travel and stress. Requires only 2 mm of travel to activate.
- External torque control – Twist and go.

EXTENDED LIFE MODELS

- Sealed Swiss motor – For higher duty cycles, longer life, and less maintenance. Sealed casing means no brush changes are necessary.
- Extended warranty on tool motor – Three year standard motor warranty.
- Compact power supply – Makes setup a breeze.
