## AIMCO Gen 4 controller Firmware upgrade instructions

**NOTE:** Updated firmware versions will typically be sent via email zip file. Always save PSet and IP address information before upgrading controller.

To update your controller you will need to extract the contents of the e-mailed zip file to a USB drive.

Insert drive into USB port of computer Right click to copy or click and drag the zip file desktop of the computer.

Right click on the desktop file and select Extract

Message descritished and paste to the

Then click Browse to locate the USB drive on your computer.

Left click on USB Disk select OK then click Extract

When extraction of data is complete remove the USB memory stick from laptop or PC and insert into any open USB port on the controller.

Using the Touch Screen or a System Port browser session, navigate to the 'Advanced' menu. Click 'Update Controller' and select the latest release. See Figure 1 as an example.
