

AcraFeed II

Automatic Screw Feeding System

- ◆ The Acrafeed II allows users to drive screws with only one hand.
- ◆ Screws are automatically fed to the head of the driving tool for increased productivity.
- ◆ Gentle handling of fasteners reduces wear or potential damage. The rocking bar design gently lifts the fasteners to the delivery track.
- ◆ AcraFeed II system reduces screw installation typically by two seconds or more per fastener by hand techniques.
- ◆ Locking finger holds fastener securely within the jaw set to assist operator with visual placement into the assembly.
- ◆ Simple locker design ensures screw up visibility.
- ◆ Each system is configured to the specific job. Pre-tested and run on actual customer parts to ensure turnkey startup on site.

How to Order: Contact your AIMCO authorized representative at 1-800-852-1368
